**Summary Writing (10 marks)**

The growth of towns depends on better town planning. And the following are important factors to consider when planning a town. There must be a plan for new buildings which can only be accepted if they are good. Industries should be located far away from homes as well as waste disposals and sewage works. Make the place airy by avoiding congestion. No buildings be allowed on wet lands; build enough gutters and keep surroundings clean. Foundations should be built on dry soils, put ceilings in houses roofed with zinc and use tiles on the floor.
